FACT SHEET 11

FIRE WORKS DISPLAY

This fact sheet explains the requirements for the notification of a fire works display.

In NSW, licensed pyrotechnicians are the only people permitted to conduct fireworks displays. The pyrotechnician is obliged to notify the Workcover Authority of NSW at least seven (7) days before the date of the display.

The pyrotechnician, event manager or landholder is also required to submit to Council a completed Notification of Fireworks Display form seven (7) days before the event.

Council recommends that neighbours should be notified of a fireworks display in a rural area. You will need to notify neighbours that are within a One (1) kilometre radius of where the display will take place.

In the Young town site or Village areas it is recommended that the event manager or landholder place a classified advertisement in the local paper to notify of the fireworks display. You will need to notify date and approximate time so that people have time to prepare.

NOTIFYING COUNCIL

Council is not the consent authority for fireworks in NSW, however you are required to notify Council seven (7) days before the display. Council may choose to make an objection to Workcover NSW or impose conditions on the use of fireworks.

When submitting your notification to Council ensure that the following information is included in your submission;

- Copy of the fireworks (single use) notification
- Copy of the completed Fireworks display checklist

A staff member from the Planning, Environment and Strategic Services Department is available for consultation at the Customer Service area between 8.30am and 11am weekdays.

At other times Staff (and in particular other professional staff like Building Surveyors, Planners & Engineers) are available via phone or by appointment (02) 6380 1203.
